NEOCARBON

Product Description:

NEOCARBON is high quality enriched coal dust which is produced by carefully selection of best coals suitable for foundry purposes. With its high volatile content and low ash, **NEOCARBON** significantly improves surface finish of pieces while decreasing moisture content and gas related defects. Due to its unique combination, it helps to reduce sand sticking and shot blasting costs.

General Physical Properties:

| | | |
|------------------------|---|------------|
| Moisture | : | 3 % Max. |
| Volatile | : | 41 % Min. |
| Ash Content: | | 6 % Max. |
| Grain Size > 0,210 mm: | | 7 % |
| Sulphur Content: | | 0,7 % Max. |

Packaging: 1000 kg bigbags, 50 kg bags.
